DETAILED ACTION

Claim Rejections - 35 USC § 102

1. Claims 1, 2, 4, 8, 9 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent 5,563,882 to Bruno et al. Note that the grounds for rejection are maintained from those set forth in the Office Action mailed August 13, 2003.

Claim Rejections - 35 USC § 103

2. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bruno et al. in view of US patent 4,477,895 to Casper et al. Note that the grounds for rejection are maintained from those set forth in the Office Action mailed August 13, 2003.

3. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bruno et al. in view of US patent 5,467,342 to Logston et al. Note that the grounds for rejection are maintained from those set forth in the Office Action mailed August 13, 2003.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bruno et al. in view of US patent 6,081,513 to Roy. Note that the grounds for rejection are maintained from those set forth in the Office Action mailed August 13, 2003.

Art Unit: 2642

5. Claims 7 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bruno et al. in view of US patent 5,625,407 to Biggs et al. Note that the grounds for rejection are maintained from those set forth in the Office Action mailed August 13, 2003.

6. Claims 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bruno et al. in view of Biggs et al. and in further view of US patent 6,275,575 to Wu. Note that the grounds for rejection are maintained from those set forth in the Office Action mailed August 13, 2003.

7. Rejections of claims 11-18 are maintained per the Office Action mailed August 13, 2003.

8. Rejections of claims 22-29 are maintained per the Office Action mailed August 13, 2003.

9. Rejections of claims 30-38 are maintained per the Office Action mailed August 13, 2003.

10. Rejections of claims 39 and 40 are maintained per the Office Action mailed August 13, 2003.

Response to Arguments

11. Applicant argues that Bruno does *not* describe “transferring the conference call from the first call resource to the second call resource” (see REMARKS pg. 20, line 5), since Bruno only discloses “changing the mode of operation” from a point-to-point conference call to a multipoint bridged conference call, which does not constitute a transfer (in Applicant’s opinion) [see REMARKS p. 20, first ¶]. However, in reference to Bruno Fig. 4, clearly a first link connecting switching office (24a) to switching office (24b) constitutes a first call resource, which is utilized

Art Unit: 2642

during initial point-to-point communication. Furthermore, second and third links (38a, 38b) constitute a second call resource, which is utilized when the conference call is subsequently bridged for multi-point communication. Thus, the transferring of the original conference call from the first link (i.e. first call resource) to the second and third links (i.e. second call resource) reads on “transferring the conference call from the first call resource to the second call resource”.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yehuda et al. US pre-grant publication US 2002/0006128 discloses “Rearrangement of data streams”. The invention of Yehuda et al. provides a method of errorless switching, in a telecommunication network, from a basic data stream to a copy of the basic data stream obtained by bridging of the basic data stream to a first network node, the method being characterized in that the switching is performed at a second network node receiving both the basic data stream and the copy data stream, upon performing an operation of delay equalization between the basic data stream and the copy data stream [see Yehuda et al. ¶ 24].
